

Natural compounds chemistry

Large and capital Equipment

System for ultra-high efficiency liquid chromatography with DAD detector

System for continuous ultrasonic extraction

Gas chromatograph with FID detector

Microwave reactor for the determination of heavy metals

Preparative high performance liquid chromatography with DAD detector

Rotary evaporator with a vacuum pump

System for extraction

Lyophiliser + accessories

Small Equipment

Safety cabinets for storing flammable liquids

Magnetic stirrer with hot plate

Safety cabinets for storage of hazardous, corrosive and flammable substances, acids and alkalis

Mechanical mixer + adapters

Sterilizer 110L

Hand, laboratory UV lamp 254/366 nm

Sterilizer 55L

Vacuum pump for water and vacuum thermometer

Ultrasonic homogenizer, volume of 200 mL

Vacuum manifold with 12 seats

Laboratory grinder

Vacuum pump

Water bath, volume of 14 L

Water bath 14 L with extras for vibration

The rotary mixer + adapters

Liquid nitrogen tank 18 L

Water bath with four places for chemistry

Laboratory dishwasher + accessories for washing pipettes, flasks and glasses

Dry bath

Hot plate

Magnetic stirrer
